

Employee Management System – User Manual

A quick-start guide for evaluating the live application

Live App: <https://rr-resorts.netlify.app/>

Source Code: github.com/anveshsameer/employee-management-system

Note: the backend runs on a free hosting tier that goes to sleep after periods of inactivity. The *first* request after idle time may take 30–50 seconds to respond while it wakes up — this is normal, not a bug.

How to Log In

1. Open <https://rr-resorts.netlify.app/> in a browser.
2. Enter one of the email/password pairs from the table below.
3. Click **Sign in**.
4. To switch roles, click **Logout** and sign in again with a different account.

Test Credentials

All accounts use the same password: `Password123`. The database is pre-populated with a small hotel-staff organization so the role-based access and reporting hierarchy are visible right away.

Name	Role	Email	Password	Designation
Raghupathi	Super Admin	raghupathi@ems.local	Password123	General Manager
Riya	Super Admin	riya@ems.local	Password123	Deputy General Manager
Rajan	HR Manager	rajan@ems.local	Password123	HR Manager
Nedumaran	Employee	nedumaran@ems.local	Password123	Head Chef (leads kitchen team)
Uthaman	Employee	uthaman@ems.local	Password123	Room Service Supervisor
Chidambaram	Employee	chidambaram@ems.local	Password123	Chef
Aishwarya	Employee	aishwarya@ems.local	Password123	Chef
Veni	Employee	veni@ems.local	Password123	Chef
Vetri	Employee	vetri@ems.local	Password123	Room Service
Pandi	Employee	pandi@ems.local	Password123	Room Service
Priya	Employee	priya@ems.local	Password123	Room Service
Akka	Employee	akka@ems.local	Password123	Janitor

What Each Role Can Do

Action	Super Admin	HR Manager	Employee
View dashboard & org chart	Yes	Yes	No
List / search / filter employees	Yes	Yes	Own profile only
Create / edit employees	Yes	Yes (not Super Admins)	No
Delete employees	Yes	No	No
Edit own profile (phone, photo, password)	Yes	Yes	Yes

Suggested Test Flow

1. Log in as **Raghupathi** (Super Admin) — view the dashboard, employee list, and org chart; try creating a new employee.
2. Log in as **Rajan** (HR Manager) — note the Delete button and "Super Admin" role option are unavailable.
3. Log in as **Nedumaran** (Employee, Head Chef) — view "My Profile," which shows his direct reports (Chidambaram, Aishwarya, Veni).
4. Log in as any Room Service staff (e.g. **Vetri**) — confirm only self-service fields are editable.

Employee Management System — deployed on Netlify (frontend) and Render (backend), with MongoDB Atlas.
